

Outline Data Science course

- **Lecture 1: Introduction**
 - What is Data Science
 - The Python DS/ML ecosystem
- Lecture 2: Data preparation
- Lecture 3: Modelling
- Lecture 4: Data visualization (+ evaluation)

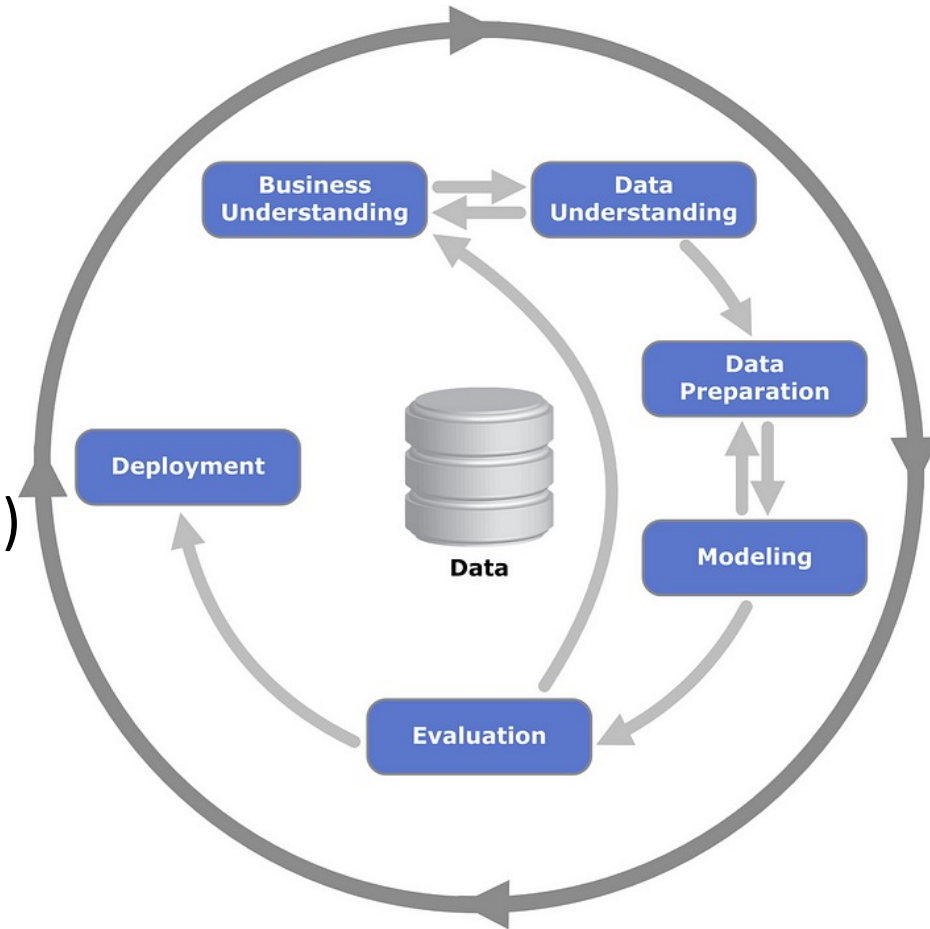

Outline Data Science course

- Lecture 1: Introduction
- **Lecture 2: Data preparation**
 - Data sources, formats, types & encoding
 - Describing data (basic descriptive analytics)
 - Preprocessing (cleaning, reduction, transformation)
- Lecture 3: Modelling
- Lecture 4: Data visualization (+ evaluation)

Outline Data Science course

- Lecture 1: Introduction
- Lecture 2: Data preparation
- **Lecture 3: Modelling**
 - The modelling process (selection, training, deployment)
 - Time series
 - Forecasting models
- Lecture 4: Data visualization (+ evaluation)

Outline Data Science course

- Lecture 1: Introduction
- Lecture 2: Data preparation
- Lecture 3: Modelling
- **Lecture 4: Data visualization (+ evaluation)**
 - Handling text
 - Visualization techniques
